To: Technical Plenary  Public  OMA Confidential  
From: MAG Download+DRM  
Affected Document and Enabler Release: OMA-Download-OTA-v1\_0-20021219-C from OMA Download version 1.0 Enabler Release  
Affected Document and Enabler Release: OMA-Download-DRMCF-v1\_0-20020913-C from OMA Digital Rights Management version 1.0 Enabler Release  
Lowest Classification:  0: New Functionality  
 1: Major Change  
 2: Bug Fix  
 3: Clerical

## 1 Summary of Changes

OMA-Download-OTA-v1\_0-20021219-C: Fixes syntactical problems in the Download Descriptor XML Schema.

OMA-Download-DRMCF-v1\_0-20020913-C: Fixes ambiguities in the "Encryption-Method" header of the DRM Content Format media type. The Backus-Naur Form (BNF) grammar for the PADDING-SCHEME and PLAINTEXT-LENGTH nodes could result in erroneous values being specified in the Encryption-Method header.

## 2 Impact on Backward Compatibility

MAG Download+DRM does not believe these changes affect backwards compatibility.

## 3 Intellectual Property Rights Considerations

No IPR has been declared for the incorporated change requests.

## 4 Recommendation

MAG Download+DRM recommends that the Technical Plenary note the above changes and incorporate the modified documents into their respective enabler releases.
