#### **Conventions** 3.1

The key words "MUST", "MUST NOT", "REQUIRED", "SHALL", "SHALL NOT", "SHOULD", "SHOULD NOT", "RECOMMENDED", "MAY", and "OPTIONAL" in this document are to be interpreted as described in [RFC2119].

All sections and appendixes, except "Scope", "Release Version Overview" and "Conformance Requirements Notation Details", are normative, unless they are explicitly indicated to be informative.

The formal notation convention used in sections 8 and 9 to formally express the structure and internal dependencies between specifications in the Enabler Release specification baseline is detailed in [SCRRULES].

#### 3.2 **Definitions**

**Enabler Release** Collection of specifications that combined together form an enabler for a service area, e.g. a download

enabler, a browsing enabler, a messaging enabler, a location enabler, etc. The specifications that are

forming an enabler should combined fulfil a number of related market requirements.

**Minimum Functionality** 

Description

Description of the guaranteed features and functionality that will be enabled by implementing the

minimum mandatory part of the Enabler Release.

**OMNA** Open Mobile Naming Authority

#### 4. Release Version Overview

The GwMO enabler allows an OMADM Server to manage devices that are not directly accessible to it (for example, because the devices are deployed behind a firewall or because the devices do not support the OMA DM protocol). It also enables the management of devices in a Machine to Machine (M2M) ecosystem (for example, fanning out DM commands from a DM Server to multiple End Devices and aggregating responses from multiple End Devices so that a consolidated response is sent back to the DM Server).

#### 4.1 Version 1.0 Functionality

GwMO V1.0 covers:

- Transparent, Proxy, and Protocol Adaptation modes of operation
- Device inventory
- · Command fanout and response aggregation
- Storage of configuration data and software image for subtending devices

The following issues are out of scope:

- Device discovery mechanisms
- Management protocol adaptation rules

#### 4.2 Version 1.1 Functionality

GwMO V1.1 covers:

- DM Gateway adaptation to non-OMA DM potocols (
  - o ZigBee,
  - o KNX.
  - o OpenWebNet,
  - Bluetooth
- Hierarchical Architecture
- Other enhancements (proxy mode security enhancements)
