4. Release Version Overview

4.1 Version 1.0 Functionality

The objective of the M2M device classification is to enable the M2M industry to group a large and ever increasing number of M2M devices into a manageable number of classes so that M2M device management and service protocols, methods, and procedures can be systematically analyzed for re-useability and incrementally developed for the gaps in handling the M2M device classes not fully addressed by existing standards.
