## 3. Terminology and Conventions

### 3.1 Conventions

The key words “MUST”, “MUST NOT”, “REQUIRED”, “SHALL”, “SHALL NOT”, “SHOULD”, “SHOULD NOT”, “RECOMMENDED”, “MAY”, and “OPTIONAL” in this document are to be interpreted as described in [RFC2119].

All sections and appendixes, except “Scope”, "Release Version Overview" and “Conformance Requirements Notation Details”, are normative, unless they are explicitly indicated to be informative.

The formal notation convention used in sections 8 and 9 to formally express the structure and internal dependencies between specifications in the Enabler Release specification baseline is detailed in [SCR RULES].

### 3.2 Definitions

**Enabler Release** Collection of specifications that combined together form an enabler for a service area, e.g. a download enabler, a browsing enabler, a messaging enabler, a location enabler, etc. The specifications that are forming an enabler should combined fulfil a number of related market requirements.

**Minimum Functionality Description** Description of the guaranteed features and functionality that will be enabled by implementing the minimum mandatory part of the Enabler Release.

## 4. Release Version Overview

Customized Multimedia Ringing (CMR) is an enabler that can make multimedia resources present to an End User according to a specified event, e.g. the establishment of a call, the arrival of a message or mail. A common use is the traditional ring back tone or ringing tone during call establishment is replaced by the subscriber customized multimedia resources. In order to present the multimedia resources and control it on the service layer, CMR enabler will provide following main functionalities.

- CMR preferences management: CMR can be provided based on CMR preferences customized by the user which consists of priority, network storage, the ringing box, the CMR presentation rules and so on. CMR preference can be manipulated by the application, the subscriber or third party.
- CMR resource management: Resource management including enable a subscriber or third party to upload CMR resources, delete the CMR resources, manage resource information (e.g. change the name of the CMR resource) etc.
- CMR Presentation control: to manage the CMR presentation via presentation rules.
  - Present the appropriate CMR resource according to CMR presentation rules.
  - Presentation control during the presenting session (i.e. interaction with the user)
- The other basic functions of CMR enabler include:
  - Charging: When CMR user purchases or manages (eg. updates or uploads) the CMR resources, and CMR service is initiated, charging information will be generated. CMR enabler can send it to charging platform.
  - Security: CMR enabler has a mechanism to authenticate and authorization to CP/SP/CMR user.
  - Privacy: CMR enabler has a mechanism to defend the privacy of CMR user.
  - Open APIs: other OMA/non-OMA enablers or the third party application can invoke the open APIs of CMR enabler to implement the CMR related service.

### 4.1 Version 1.0 Functionality

The Version 1.0 release of the CMR Enabler contains all functions describe in the above paragraph.
