3. Terminology and Conventions

3.1 Conventions

The key words "MUST", "MUST NOT", "REQUIRED", "SHALL", "SHALL NOT", "SHOULD", "SHOULD NOT", "RECOMMENDED", "MAY", and "OPTIONAL" in this document are to be interpreted as described in [RFC2119].

All sections and appendixes, except "Scope" and "Introduction", are normative, unless they are explicitly indicated to be informative.

The formal notation convention used in sections 8 and 9 to formally express the structure and internal dependencies between specifications in the Enabler Release specification baseline is detailed in [IOPPROC].

3.2 Definitions

Enabler Release	Collection of specifications that combined together form an enabler for a service area, e.g. a download enabler, a browsing enabler, a messaging enabler, a location enabler, etc. The specifications that are forming an enabler should combined fulfil a number of related market requirements.
Minimum Functionality Description	Description of the guaranteed features and functionality that will be enabled by implementing the minimum mandatory part of the Enabler Release.

For definitions of terms not found here, please refer to [OMADICT].

3.3 Abbreviations

AD	Architecture Document
API	Application Programming Interface
ERDEF	Enabler Requirement Definition
ERELD	Enabler Release Definition
OMA	Open Mobile Alliance™
RD	Requirements Document

4. Release Version Overview

This document outlines the Enabler Release Definition for the Charging Enabler and the respective conformance requirements for clients and servers claiming compliance to it as defined by Open Mobile Alliance across the specification baseline.

The motivation for the creation of a Charing Enabler was established in the Work Item outlining the effort. The ability to charge for service usage is fundamental when creating services using OMA enablers.

4.1 Version 1.0 Functionality

The first version of the Enabler Release specifies the OMA Charging interfaces and a protocol binding to Diameter Applications.

4.2 Version 1.1 Functionality

The new version of the Enabler Release specifies how the OMA CH-2 interface MAY be exposed as a Web Service, which is compliant with the Parlay X Web Services Payment API.

The current version also includes technical refinements and changes to the maintenance of OMA Charging Data Elements.

5. Document Listing for Charging V 1.1 Enabler

This section is normative.

Doc Ref	Permanent Document Reference	Description
Requirement Document

6. OMNA Considerations

No OMNA items included in the release.

The OMA Charging Data Elements are defined in a specific data definition specification.

7. Conformance Requirements Notation Details

This section is informative

The tables in following chapters use the following notation:

Item: Entry in this column MUST be a valid ScrItem according to [SCRRULES].

Feature/Application: Entry in this column SHOULD be a short descriptive label to the **Item** in question.

Status: Entry in this column MUST accurately reflect the architectural status of the **Item** in question.

- M means the **Item** is mandatory for the class

- O means the **Item** is optional for the class

- NA means the **Item** is not applicable for the class

Requirement: Expression in the column MUST be a valid TerminalExpression according to [IOPPROC] and it MUST accurately reflect the architectural requirement of the **Item** in question.

8. ERDEF for Charging Enabler - Client Requirements

This section is normative.

Item	Feature / Application	Status	Requirement
OMA-ERDEF-Charging-C-001	Online Charging Client	O*	[CHRG_ONLINE]
OMA-ERDEF-Charging-C-002	Offline Charging Client	O*	[CHRG_OFFLINE]

Table 2: ERDEF for Charging V1.1 Client-side Requirements

* At least one of these is required

9. ERDEF for Charging Enabler - Server Requirements

This section is normative.

Item	Feature / Application	Status	Requirement
OMA-ERDEF-Charging-S-001	Online Charging Server	M	[CHRG_ONLINE]
OMA-ERDEF-Charging-S-002	Offline Charging Server	O	[CHRG_OFFLINE]
