

# **Enabler Release Definition for OMA Device Management**

Candidate Version 1.3 – 07 Dec 2010

---

**Open Mobile Alliance**  
OMA-ERELED-DM-V1\_3-20101207-C

Use of this document is subject to all of the terms and conditions of the Use Agreement located at <http://www.openmobilealliance.org/UseAgreement.html>.

Unless this document is clearly designated as an approved specification, this document is a work in process, is not an approved Open Mobile Alliance™ specification, and is subject to revision or removal without notice.

You may use this document or any part of the document for internal or educational purposes only, provided you do not modify, edit or take out of context the information in this document in any manner. Information contained in this document may be used, at your sole risk, for any purposes. You may not use this document in any other manner without the prior written permission of the Open Mobile Alliance. The Open Mobile Alliance authorizes you to copy this document, provided that you retain all copyright and other proprietary notices contained in the original materials on any copies of the materials and that you comply strictly with these terms. This copyright permission does not constitute an endorsement of the products or services. The Open Mobile Alliance assumes no responsibility for errors or omissions in this document.

Each Open Mobile Alliance member has agreed to use reasonable endeavors to inform the Open Mobile Alliance in a timely manner of Essential IPR as it becomes aware that the Essential IPR is related to the prepared or published specification. However, the members do not have an obligation to conduct IPR searches. The declared Essential IPR is publicly available to members and non-members of the Open Mobile Alliance and may be found on the “OMA IPR Declarations” list at <http://www.openmobilealliance.org/ipr.html>. The Open Mobile Alliance has not conducted an independent IPR review of this document and the information contained herein, and makes no representations or warranties regarding third party IPR, including without limitation patents, copyrights or trade secret rights. This document may contain inventions for which you must obtain licenses from third parties before making, using or selling the inventions. Defined terms above are set forth in the schedule to the Open Mobile Alliance Application Form.

NO REPRESENTATIONS OR WARRANTIES (WHETHER EXPRESS OR IMPLIED) ARE MADE BY THE OPEN MOBILE ALLIANCE OR ANY OPEN MOBILE ALLIANCE MEMBER OR ITS AFFILIATES REGARDING ANY OF THE IPR'S REPRESENTED ON THE “OMA IPR DECLARATIONS” LIST, INCLUDING, BUT NOT LIMITED TO THE ACCURACY, COMPLETENESS, VALIDITY OR RELEVANCE OF THE INFORMATION OR WHETHER OR NOT SUCH RIGHTS ARE ESSENTIAL OR NON-ESSENTIAL.

THE OPEN MOBILE ALLIANCE IS NOT LIABLE FOR AND HEREBY DISCLAIMS ANY DIRECT, INDIRECT, PUNITIVE, SPECIAL, INCIDENTAL, CONSEQUENTIAL, OR EXEMPLARY DAMAGES ARISING OUT OF OR IN CONNECTION WITH THE USE OF DOCUMENTS AND THE INFORMATION CONTAINED IN THE DOCUMENTS.

# 1. Scope

The scope of this document is limited to the Enabler Release Definition of Device Management according to OMA Release process and the Enabler Release specification baseline listed in section 5. The OMA DM v1.3 specifications are based on the OMA Device Management (DM) v1.2.1 specifications with various enhancements.

## 2.2 Informative References

None.

## 3. Terminology and Conventions

### 3.1 Conventions

The key words “MUST”, “MUST NOT”, “REQUIRED”, “SHALL”, “SHALL NOT”, “SHOULD”, “SHOULD NOT”, “RECOMMENDED”, “MAY”, and “OPTIONAL” in this document are to be interpreted as described in [RFC2119].

All sections and appendixes, except “Scope” and “Introduction”, are normative, unless they are explicitly indicated to be informative.

The formal notation convention used in sections 7 and 8 to formally express the structure and internal dependencies between specifications in the Enabler Release specification baseline is detailed in [IOPPROC].

### 3.2 Definitions

<b>Device Management</b>	Management of the Device configuration and other managed objects of Devices from the point of view of the various Management Authorities. Device Management includes, but is not restricted to setting initial configuration information in Devices, subsequent updates of persistent information in Devices, retrieval of management information from Devices and processing events and alarms generated by Devices.
<b>Enabler Release</b>	Collection of specifications that combined together form an enabler for a service area, e.g. a download enabler, a browsing enabler, a messaging enabler, a location enabler, etc. The specifications that are forming an enabler should combined fulfill a number of related market requirements.
<b>Minimum Functionality Description</b>	Description of the guaranteed features and functionality that will be enabled by implementing the minimum mandatory part of the Enabler Release.

### 3.3 Abbreviations

<b>DM</b>	Device Management
<b>DTD</b>	Document Type Definition
<b>ERDEF</b>	Enabler Requirement Definition
<b>ERELD</b>	Enabler Release Definition
<b>HTTP</b>	Hypertext Transfer Protocol
<b>MIME</b>	Multipurpose Internet Mail Extension
<b>OBEX</b>	Object Exchange protocol
<b>OMA</b>	Open Mobile Alliance
<b>RD</b>	Requirements Document
<b>SCR</b>	Static Conformance Requirements
<b>SyncML</b>	Synchronization Mark-up Language
<b>WAP</b>	Wireless Application Protocol
<b>WSP</b>	Wireless Session Protocol
<b>XML</b>	Extensible Mark-up Language

## 4. Release Version Overview

This section is informative. It describes the functionality that is delivered with the OMA Device Management specifications and their internal mandatory requirements.

The OMA DM specifications define the protocols and mechanisms for how configuration parameters can be delivered to an OMA client from an OMA DM server that is part of the overall architecture. The mandatory functionality defines a set of commands used in the DM protocol for various management procedures as well as needed security level for management session. Mandatory management tree is used as server interface to the device, which includes several mandatory management objects that are providing basic device management functionality.

The optional functionality covers several additional commands in DM protocol. Also, support for notification initiated session and bootstrapping is recommended, but optional functionality.

This document outlines the Enabler Release Definition for DM and the respective conformance requirements for client and server implementations claiming compliance to the Open Mobile Alliance DM v1.3 specifications.

Device management is the generic term used for technology that allows third parties to carry out the difficult procedures of configuring mobile devices on behalf of the end user (customer). Third parties would typically be wireless operators, service providers or corporate information management departments.

Through device management, an external party can remotely set parameters, conduct troubleshooting servicing of terminals, install or upgrade software. In broad terms, device management consists of three parts:

- Protocol and mechanism: The protocol used between a management server and a mobile device
- Data model: The data made available for remote manipulation, for example browser and mail settings
- Policy: The policy decides who can manipulate a particular parameter, or update a particular object in the device

In a wireless environment, the crucial element for device management protocol is the need to efficiently and effectively address the characteristics of mobile devices including low bandwidth and high latency.

### 4.1 Version 1.1.2 Functionality

DM 1.0 and 1.1 were completed under the auspices of the SyncML Initiative. DM 1.1.2 was a re-release of the same basic enabler under the OMA auspices. DM 1.1.2 provided basic remote device management capabilities for writing and reading device settings. The enabler strongly depended upon Client Provisioning for initial provisioning for this release.

### 4.2 Version 1.2 Functionality

DM 1.2 expanded on DM 1.1 by increasing security requirements, providing bootstrap capabilities that complement Client Provisioning capabilities, Generic Alert, and the ability to provision and read entire management objects. New node formats (such as Date, Time, etc) were added. Security functionality was significantly improved – XML encryption was added, and TLS/SSL was mandated for HTTP. Many minor improvements to the specification were also included.

#### 4.2.1 Version 1.2.1 Functionality

DM 1.2.1 is a bug-fix release that removes most of the remaining ambiguities in the specification. No normative changes were made.

### 4.3 Version 1.3 Functionality

The DM V1.3 Enabler supports the following additional functionality:

- Sessionless DM

- Support for rich information in notification message including expiration, reason for session, etc.
- SIP Push and HTTP Push binding for DM Notification
- Enhancement on existing bootstrap mechanism in DM 1.2
- Support Client to request bootstrap using HTTPS GET
- Clarification regarding Inbox and TNS Usage
- Support for the discovery of optional DM features supported by the DM client
- XML Signature and XML Encryption as additional integrity and confidentiality mechanisms respectively for DM messages
- Mandating support for TLS 1.1 and recommending support for TLS 1.2 for HTTP Binding
- Relative URI based addressing
- Enhanced DM structural query
- Indication of the roaming status and bearer for the current DM session

The DM V1.3 enabler merged the OMA SyncML Common V1.2 into its own release.

## 5. Document Listing for Device Management 1.3

This section is normative.

## 6. Conformance Requirements Notation Details

This section is informative

The tables in following chapters use the following notation:

<b>Item:</b>	Entry in this column <b>MUST</b> be a valid ScrItem according to [IOPPROC].
<b>Feature/Application:</b>	Entry in this column <b>SHOULD</b> be a short descriptive label to the <b>Item</b> in question.
<b>Status:</b>	Entry in this column <b>MUST</b> accurately reflect the architectural status of the <b>Item</b> in question. <ul style="list-style-type: none"><li>• M means the <b>Item</b> is mandatory for the class</li><li>• O means the <b>Item</b> is optional for the class</li><li>• NA means the <b>Item</b> is not applicable for the class</li></ul>
<b>Requirement:</b>	Expression in the column <b>MUST</b> be a valid TerminalExpression according to [IOPPROC] and it <b>MUST</b> accurately reflect the architectural requirement of the <b>Item</b> in question.

## 7. ERDEF for Device Management – Client Requirements

This section is normative.

Item	Feature / Application	Status	Requirement
OMA-ERDEF-DM-C-001	DM Client	M	[DMPRO] AND [DMREPU] AND [DMSEC] AND [DMTND] AND [DMTNS] AND [DMSTDOBJ] AND [DMDDFDTD] AND [DMBOOT] AND [META].
OMA-ERDEF-DM-C-003	DM Client Notification	O	[DMNOTI]
OMA-ERDEF-DM-C_004	DM Client Sessionless	O	[DMSESS]
OMA-ERDEF-DM-C_005	DM Client HTTP Binding	O	[HTTPBinding]
OMA-ERDEF-DM-C_006	DM Client OBEX Binding	O	[OBEXBinding]
OMA-ERDEF-DM-C_007	DM Client WSP Binding	O	[WSPBinding]
OMA-ERDEF-DM-C_008	DM Client Push Binding	O	[PushBinding]

**Table 2: ERDEF for Device Management Client-side Requirements**

## 8. ERDEF for Device Management – Server Requirements

This section is normative.

Item	Feature / Application	Status	Requirement
OMA-ERDEF-DM-S-001	DM Server	M	[DMPRO] AND [DMREPU] AND [DMSEC] AND [DMTND] AND [DMTND] AND [DMTND] AND [DMTND] AND [DMSTDOBJ] AND [DMDDFDTD] AND [META].
OMA-ERDEF-DM-S-002	DM Server Bootstrap	O	[DMBOOT]
OMA-ERDEF-DM-S-003	DM Server Notification	O	[DMNOTI]
OMA-ERDEF-DM-S-004	DM Server Sessionless	O	[DMSESS]
OMA-ERDEF-DM-S_005	DM Server HTTP Binding	O	[HTTPBinding]
