Use of this document is subject to all of the terms and conditions of the Use Agreement located at <http://www.openmobilealliance.org/UseAgreement.html>.

Unless this document is clearly designated as an approved specification, this document is a work in process, is not an approved Open Mobile Alliance™ specification, and is subject to revision or removal without notice.

You may use this document or any part of the document for internal or educational purposes only, provided you do not modify, edit or take out of context the information in this document in any manner. Information contained in this document may be used, at your sole risk, for any purposes. You may not use this document in any other manner without the prior written permission of the Open Mobile Alliance. The Open Mobile Alliance authorizes you to copy this document, provided that you retain all copyright and other proprietary notices contained in the original materials on any copies of the materials and that you comply strictly with these terms. This copyright permission does not constitute an endorsement of the products or services. The Open Mobile Alliance assumes no responsibility for errors or omissions in this document.

Each Open Mobile Alliance member has agreed to use reasonable endeavors to inform the Open Mobile Alliance in a timely manner of Essential IPR as it becomes aware that the Essential IPR is related to the prepared or published specification. However, the members do not have an obligation to conduct IPR searches. The declared Essential IPR is publicly available to members and non-members of the Open Mobile Alliance and may be found on the “OMA IPR Declarations” list at <http://www.openmobilealliance.org/ipr.html>. The Open Mobile Alliance has not conducted an independent IPR review of this document and the information contained herein, and makes no representations or warranties regarding third party IPR, including without limitation patents, copyrights or trade secret rights. This document may contain inventions for which you must obtain licenses from third parties before making, using or selling the inventions. Defined terms above are set forth in the schedule to the Open Mobile Alliance Application Form.

**NO REPRESENTATIONS OR WARRANTIES (WHETHER EXPRESS OR IMPLIED) ARE MADE BY THE OPEN MOBILE ALLIANCE OR ANY OPEN MOBILE ALLIANCE MEMBER OR ITS AFFILIATES REGARDING ANY OF THE IPR'S REPRESENTED ON THE “OMA IPR DECLARATIONS” LIST, INCLUDING, BUT NOT LIMITED TO THE ACCURACY, COMPLETENESS, VALIDITY OR RELEVANCE OF THE INFORMATION OR WHETHER OR NOT SUCH RIGHTS ARE ESSENTIAL OR NON-ESSENTIAL.**

**THE OPEN MOBILE ALLIANCE IS NOT LIABLE FOR AND HEREBY DISCLAIMS ANY DIRECT, INDIRECT, PUNITIVE, SPECIAL, INCIDENTAL, CONSEQUENTIAL, OR EXEMPLARY DAMAGES ARISING OUT OF OR IN CONNECTION WITH THE USE OF DOCUMENTS AND THE INFORMATION CONTAINED IN THE DOCUMENTS**

## Figures

The document does not contain any figures.

## Tables

The document does not contain any tables.

# 1. Scope

The scope of this document is to give the Enabler Release Definition of IMSInOMA according to OMA Release process and the Enabler Release specification baseline listed in section 5.

## 2. References

### 2.1 Normative References

### 2.2 Informative References

None.

## 3. Terminology and Conventions

### 3.1 Conventions

The key words “MUST”, “MUST NOT”, “REQUIRED”, “SHALL”, “SHALL NOT”, “SHOULD”, “SHOULD NOT”, “RECOMMENDED”, “MAY”, and “OPTIONAL” in this document are to be interpreted as described in [RFC2119].

All sections and appendixes, except “Scope” and “Introduction”, are normative, unless they are explicitly indicated to be informative.

### 3.2 Definitions

<b>Enabler Release</b>	Collection of specifications that combined together form an enabler for a service area, e.g. a download enabler, a browsing enabler, a messaging enabler, a location enabler, etc. The specifications that are forming an enabler should combined fulfil a number of related market requirements.
<b>Minimum Functionality Description</b>	Description of the guaranteed features and functionality that will be enabled by implementing the minimum mandatory part of the Enabler Release.

Other terms used in the IMSInOMA enabler release are defined in [IMS in OMA RD] and in [IMS in OMA AD].

### 3.3 Abbreviations

<b>AS</b>	Application Server
<b>ERDEF</b>	Enabler Requirement Definition
<b>ERELED</b>	Enabler Release Definition
<b>ESI</b>	Enabler Server Implementation
<b>ETI</b>	Enabler Terminal Implementation
<b>IMS</b>	IP Multimedia Subsystem
<b>OMA</b>	Open Mobile Alliance
<b>OSE</b>	OMA Service Environment
<b>3GPP</b>	3rd Generation Partnership Project
<b>3GPP2</b>	3rd Generation Partnership Project 2

Other abbreviations used in the IMSInOMA enabler release are listed in [IMS in OMA RD] and in [IMS in OMA AD].

## 4. Introduction

This document outlines the Enabler Release Definition for IMSInOMA.

The IMSInOMA Enabler Release Version 1.0 specifications are the Requirements Document [IMS in OMA RD], Architecture Document [IMS in OMA AD] and Enabler Test Requirements document [IMS in OMA ETR], which provide the means for OMA enablers to use the IMS as specified by 3GPP/3GPP2.

The purpose of the IMSInOMA Enabler Release is to specify how OMA enablers use IMS in an interoperable way. It is important to note that this does not imply that OMA enablers are required to use IMS; however, for those enablers that do so, the IMSInOMA specifications provide normative guidance.

## 5. Enabler Release Specification Baseline

This section is normative.

The following specifications comprise the IMSinOMA Enabler Release Package:

- Requirements Document (RD): “Requirements for the utilization of IMS capabilities”, [IMS in OMA RD]
- Architecture Document (AD): “Utilization of IMS capabilities, Architecture”, [IMS in OMA AD]

## 6. Minimum Functionality Description for the IMS in OMA Enabler Release

This section is informative.

This Enabler Release specifies how IMS is related to OSE and how IMS fits into the OSE context and how OMA enablers shall interface with IMS.

The IP Multimedia Subsystem (IMS) is a Session Initiation Protocol (SIP) based IP multimedia infrastructure that provides a complete architecture and framework for providing multimedia services. This includes but is not limited to security functions (e.g. authentication, authorization), routing, charging, and default codecs. Thus, IMS provides a platform for globally interoperable IP multimedia services - especially in the mobile environment. The IMS is standardized by 3GPP/3GPP2.

IMS allows applications, i.e. commercial services, to access capabilities of the IMS. It comprises options for service provisioning, namely SIP-Application Server and OSA Gateway. IMS provides service-enabling functions and IP transport and is therefore relevant to the OMA Service Environment (OSE).

OMA enabler implementations may make use of IMS capabilities, e.g. charging, authentication, service management, etc. IMS related applications/enablers can use OSE capabilities in addition to IMS capabilities.

OMA specifies how OMA enablers use the interfaces of IMS, but the actual protocols of the interfaces are under the responsibility of 3GPP/3GPP2.

## 7. Conformance Requirements Notation Details

This section is informative.

The Static Conformance Requirements are listed in Appendix B of the AD [IMS in OMA AD], together with the notation details.

## 8. ERDEF for IMS in OMA - Client Requirements (Normative)

The AD [IMS in OMA AD] describes a general Enabler Terminal Implementation, abbreviated ETI, which can communicate with an Enabler Server Implementation (ESI) via the underlying network. The 3GPP/3GPP2 term “Terminal” can correspond to an OMA enabler terminal implementation, ETI, i.e. Client.

The Static Conformance Requirements for the Client, i.e. the Enabler Terminal Implementation (ETI), are listed in Appendix B of the AD [IMSinOMA AD].

## 9. ERDEF for IMS in OMA - Server Requirements (Normative)

The IMS related Enabler Server Implementations can correspond to the IMS Application servers. The ESI is typically part of the fixed network infrastructure run by the IMS operator or third party service providers.

The Static Conformance Requirements for the Server, i.e. the Enabler Server Implementation (ESI), are listed in Appendix B of the AD [IMSInOMA AD].

## Appendix A. Change History

(Informative)

### A.1 Approved Version History
