3. Terminology and Conventions

3.1 Conventions

The key words "MUST", "MUST NOT", "REQUIRED", "SHALL", "SHALL NOT", "SHOULD", "SHOULD NOT", "RECOMMENDED", "MAY", and "OPTIONAL" in this document are to be interpreted as described in [RFC2119].

All sections and appendixes, except "Scope", "Release Version Overview" and "Conformance Requirements Notation Details", are normative, unless they are explicitly indicated to be informative.

The formal notation convention used in sections 8 and 9 to formally express the structure and internal dependencies between specifications in the Enabler Release specification baseline is detailed in [SCRRULES].

3.2 Definitions

Class of Service	Use definition from [PAL_AD].
Enabler Release	Collection of specifications that combined together form an enabler for a service area, e.g. a download enabler, a browsing enabler, a messaging enabler, a location enabler, etc. The specifications that are forming an enabler should combined fulfil a number of related market requirements.
Minimum Functionality Description	Description of the guaranteed features and functionality that will be enabled by implementing the minimum mandatory part of the Enabler Release.
PAL Client	Use definition from [PAL_RD].
PAL Profile	Use definition from [PAL_RD].
PAL Service	Use definition from [PAL_RD].
Presence Aspect	Use definition from [PAL_RD].
Presence Aware Service	Use definition from [PAL_RD].
Presence Context	Use definition from [PAL_RD].
Presence Information	Use definition from [PRS_RD].
Presence Information Elements	Use definition from [PRS_RD].
Presence Triggers	Use definition from [PAL_RD].

4. Release Version Overview

4.1 Version 1.0 Functionality

The Presence Access Layer (PAL) Enabler complements OMA Presence SIMPLE. PAL specifies logically interoperable abstractions known as Presence Aspects. Presence Aspects consolidate Presence Information based on one or more Presence Information Elements. Presence Aspects are based on underlying rules that fully align with OMA Presence SIMPLE and Implementation Guidelines for OMA Presence SIMPLE. Further, Presence Triggers provide a mechanism for a Presence Aware Service to execute a specified action (also specified by rules) when a change is detected for a corresponding Presence Aspect.

Presence Context associates applicable Presence Aspects required to fulfill service function points with a Presence Aware Service. This provides PAL Client's with a consolidated and determinate view of Presence Information. That is, a PAL Client need only interact with a specific subset of interoperable Presence Aspects and/or Presence Triggers as specified by the resolved Presence Context, for a given Presence Aware Service or Class of Service.

The PAL Enabler includes the following features:

- PAL Client interraction including common interoperable Presence Aspects, and Presence Triggers based on consolidated Presence Information;

- Establish and resolve Presence Context associated with a Presence Aware Service;

- Interworking with information owning enablers (e.g. OMA Presence SIMPLE);

- Privacy and security of information sources, and clients; and

- Configuration and administration based on PAL Profiles.

6. OMNA Considerations

7. Conformance Requirements Notation Details

This section is informative

The tables in following chapters use the following notation:

Item: Entry in this column MUST be a valid ScrItem according to [SCRRULES].

Feature/Application: Entry in this column SHOULD be a short descriptive label to the **Item** in question.

Requirement: Expression in the column MUST be a valid TerminalExpression according to [SCRRULES] and it
                               MUST accurately reflect the architectural requirement of the **Item** in question.
